The pedagogy involves various teaching methods: case studies, simulations, role plays, closed group analyses and applied to learn projects, interspersed with lecture sessions on theory and practice. The sessions are essentially interactive, and participants are encouraged to question assumptions, identify opportunities, solve complex problems, develop operational performance, boost productivity, and in the process, build sustainable competitive advantage. The knowledge and insights gained because of such sessions have immediate applications for high-priority management challenges. As a result, participants and the sponsoring organization receive a rapid –and lasting– return on investment.
